

Project Initialization and Planning Phase

Date	25 June 2026
Team ID	-
Project Name	EduGenie – AI-Powered Educational Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. A well-articulated customer problem statement allows the team to find the ideal solution for the customers' challenges and to empathize with how they perceive the product.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a college student.	get quick, accurate answers to academic questions.	textbooks and generic search results are slow and not tailored to my level.	there is no single assistant that explains concepts, quizzes me, and tracks my learning.	overwhelmed and inefficient while studying.
PS-2	a self-learner preparing for exams.	revise large volumes of study material quickly.	manually summarizing PDFs/notes takes hours.	there is no automated way to condense long documents into key points.	anxious about running out of time before exams.
PS-3	a student planning to learn a new subject.	follow a structured, personalized learning path.	most online resources are unstructured and not tailored to my current level.	there is no tool that builds a step-by-step roadmap for a chosen topic and duration	lost about where to start and what to learn next.
