Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Student, Gemini API)
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Authenticate User, Process AI Request).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Users, App Data in MongoDB).
Labelled arrow	Data Flow	The movement of data between entities, processes, and data stores, labelled with what data is being passed.

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

EduGenie – Data Flow Diagram (DFD)
