

Communication

Date	2 July 2026
Team ID	-
Project Name	EduGenie – AI-Powered Educational Assistant
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S. No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Project Planning	Daily	Personal Task Planner, VS Code	Terish Charan Tej Immidisetti	Planned project milestones, feature implementation, and development schedule.
2	Self-Progress Tracking	Daily	GitHub, Local Development	Terish Charan Tej Immidisetti	Tracked implementation progress and maintained version control.
3	Technical Research	As Needed	Official Documentation, Stack Overflow, Fast API Docs, MongoDB Docs	Terish Charan Tej Immidisetti	Resolved technical issues and implemented project features.
4	Development Review	Weekly	GitHub, VS Code	Terish Charan Tej Immidisetti	Reviewed project progress, verified completed modules, and refined the implementation plan.
5	Final Testing & Debugging	Once	Local Environment	Terish Charan Tej Immidisetti	Tested all modules before final submission.
6	Documentation & Repository Management	Throughout Project	Microsoft Word, GitHub	Terish Charan Tej Immidisetti	Prepared reports, diagrams, README, and maintained the GitHub repository.

Communication Challenges & Resolutions:

S. No	Challenge Faced	Resolution / Action Taken
1	Minimal participation and communication from other assigned team members during the project lifecycle.	Independently completed the entire project, including requirement analysis, system design, frontend, backend, database integration, AI integration, testing,

		documentation, GitHub management, and final submission.
2	No effective collaboration or task distribution within the assigned team.	Planned and executed all development activities independently to ensure the project met all functional requirements and submission deadlines.
3	Integrating multiple technologies such as Fast API, MongoDB Atlas, JWT authentication, and Google Gemini API.	Studied the official documentation, performed iterative testing, and resolved implementation issues through debugging and self-learning.
